Portfolio: ajay.patel.help

PROFESSIONAL SUMMARY

Motivated DevOps and Cloud enthusiast with hands-on knowledge of AWS, Azure, GCP, Docker, and Kubernetes — including Pods, Deployments, RBAC, Helm, and ArgoCD. Proficient in Infrastructure as Code using Terraform and OpenTofu, CI/CD pipelines using Jenkins and GitLab CI/CD, and configuration management using Ansible, along with version control via Git and GitHub. Familiar with Maven, SonarQube, and Linux environments, focused on building scalable and automated cloud infrastructure.

TECHNICAL SKILLS

- **AWS:** EC2, VPC, S3, IAM, Application Load Balancer, Auto Scaling, CloudFront, Route 53, EKS, EBS Snapshots
- **Docker:** Dockerfile creation, Image building, Container management, Docker Hub
- **Kubernetes:** Pods, Deployments, Services, RBAC, Namespaces, Helm, kubectl, EKS, Volumes
- **Infrastructure as Code:** Terraform, OpenTofu
- **CI/CD Tools:** Jenkins, GitHub Actions, GitLab CI/CD
- **Version Control:** Git, GitHub, GitLab
- **Build Tool:** Maven
- **Code Quality:** SonarQube
- **Monitoring & Logging:** CloudWatch, Grafana, Prometheus
- **Database Management:** Amazon RDS, DynamoDB, MySQL
- **Operating System:** Linux (Ubuntu, CentOS)

PROJECTS

Docker + Jenkins — Java Spring Boot Project

- Automated build and deployment of a Java Spring Boot application using Jenkins pipelines
- Dockerized the application and deployed to a container environment using Maven for build management
- Configured Jenkins shared libraries for reusable pipeline stages across projects
github.com/Ajaypatel001/Docker-Jenkins-Java-springboot-project

Google Store DevOps Project

- Built and deployed a full-stack application on AWS EKS using Kubernetes, Terraform, and Docker
- Implemented CI/CD using ArgoCD and managed secrets via GitHub
- Configured RDS (MySQL), Ingress-Nginx, and Load Balancer for scalable architecture
- Integrated monitoring (Prometheus, Grafana) and logging (EFK Stack)

ACHIEVEMENTS

- **Hackfest 2026 – Naresh IT:** Developed and deployed an AI-enabled "AgroWatch – Smart Farming with AI" using AWS cloud services and DevOps tools with CI/CD pipeline for scalable and automated deployment.
- **MiltCloud – DevOps Certification, Naresh IT:** Completed 6-month hands-on DevOps training program covering cloud infrastructure, containerization, and CI/CD automation practices.

EDUCATION

B.Tech — Computer Science Engineering (Currently Pursuing)

Eklavya University

Diploma in Computer Science Engineering — 7.5 CGPA

Eklavya University

12th Grade — 69.76%

Govt. Higher Secondary School
